August 2026

The Alemlube 11205PTAN 20L Oil Drum Pumptube Assembly is designed and engineered to be used for the transfer of hydraulic oil, engine oil and gear oil up to SAE140 can also be used with transmission fluid, coolant & diesel fuel.

Designed & engineered with performance, durability and serviceability in mind the 11205PTAN pumptube assembly is built to last.

The three point pumptube to motor locking system is robust and durable providing the pump with integral stability and strength.

The steel to steel impeller maximises priming capability, whilst at the same time minimising current draw and maximising battery operating time per charge.

The built in swivel on the on/off oil control valve avoids annoying and avoidable hose kinks and the drain back nozzle holster in the housing ensures that excess oil ends up in the drum and not on your workshop floor.

The control valve can be locked open as and if required and the sealed system design eliminates the possibility of foreign particle contamination.

With the aid of the quick coupling motor assembly, one motor can be used in conjunction with multiple pumptubes reducing upfront set up costs.

Also suitable for the transfer of transmission fluids, coolant & diesel fuel, the 11205PTAN will become your time creator and energy saver.

The 11205PTAN pumptube features a threaded three-section design (upper, middle, lower) that allows flexible use with both 60L and 205L drums, reaching the bottom for complete oil extraction. The threaded connections ensure a tight seal and superior vacuum performance, unlike plastic extension tubes that can lose efficiency due to air gaps.

SPECIFICATIONS, FEATURES & BENEFITS

- Designed & engineered with performance, durability and serviceability front of mind
- Drainback nozzle holster ensures that excess oil returns to the drum
- Swivelling control valve eliminates the chance of annoying hose kinks
- Control valve can be locked in the open position
- Sealed system design eliminates foreign particle contamination
- Also suitable for the transfer of transmission fluid, coolant & diesel fuel

Also available:

- 11205N** Battery Operated 20L Oil Drum Pump
Package includes:
 11000MA# Modular motor assembly
 + on/off control valve (IK10 rated)
 11000B# 21.6V Li-ion battery (IK9 rated)
 11000BC# 240V battery charger
 2m x 19mm ID long delivery hose
- 1120PTAN** 20L Oil Drum Pumptube Assembly
- 1120N** Battery Operated 20L Oil Drum Pump

Designed for use with the 11000N Series.
