

KPH350.45**Ravaglioli 2P 4.5T Asymmetric Vehicle Hoist****Ravaglioli**

March 2025

The KPH350.45 Ravaglioli Electro-hydraulic 2 Post Clear Floor Hoist is a reliable and high-quality solution for vehicle repair and maintenance.

Designed with a 4.5-tonne lifting capacity, this hoist is ideal for use in dealerships, independents, commercial vehicle and even domestic workshops.

Its clear floor design ensures a clean, unobstructed workspace, eliminating tripping hazards by running hoses and wires overhead. The asymmetric post design provides a wider drive-through area, while taking up minimal space, making it easier for operators to enter and exit vehicles.

Door guards, an automatic arm locking system and mechanical safety locks on each post offer additional safety during use.

This versatile hoist accommodates a variety of vehicle sizes with 3-stage front arms and 2-stage rear arms, as well as 100mm and 136mm pad extensions. With an efficient electro-hydraulic operation and 2 symmetric posts, this lift can seamlessly fit into most workshops for immediate operation.

CE-approved and registered with Australian Worksafe, the hoist meets stringent safety standards, and when installed and serviced by the Alemlube team, it comes with a 30 month extended warranty for added peace of mind.

This hoist is European made with high quality components and combines practical design with robust performance and safety making it a reliable addition to any workshop.

SPECIFICATIONS, FEATURES AND BENEFITS

- Ravaglioli 2 post 4.5t electro-hydraulic vehicle hoist
- Low profile asymmetric arms
- Ideal for wheel alignment operations for vans, mini-buses, trucks & light commercial vehicles up to 4.5t
- Total height 3,850mm, total width 3,486mm
- Symmetric post design enables easy access to the pick-up points of the vehicle
- Lifting capacity 4.5 tonne
- Drive through width 2,659mm
- Lifting time 54 seconds
- Maximum lifting height 1,863mm (1,928mm with extensions)
- Automatic arm safety locking system with automatic engagement & automatic release when arm reaches the floor
- 2 pistons for intensive use designed to minimise down-time
- Manual release by side lever
- Powder coated dark grey colour finish
- 400V 3 phase power
- Gross weight 750kg
- CE approved
- Australian WORKSAFE compliant
